

# Creating Autism -Friendly Community Mental Health Services

We  
want you  
to  
**HAVE  
YOUR SAY**

Are you 12 years of age or older?  
Are you on the autism spectrum?  
Do you also have a mental health condition?  
Would you like your voice to be heard?

Many people on the autism spectrum also have a mental health condition.

Autism Queensland is developing training packages for mental health professionals to help them deliver effective mental health treatment to people on the autism spectrum.

We'd like to hear from adolescents and adults who are on the autism spectrum, and who also have a mental health condition. If you're a family member or carer of one of these individuals, we'd like to hear your voice too.

With your help we hope to create a better service experience for people on the autism spectrum who also have a mental health condition.
