

Creating Autism-Friendly Community Mental Health Services

A+MH

Are you a general practitioner or mental health practitioner?*

Want to learn more about autism and mental health?

Want to share your experiences providing mental health referrals and support?

Many people on the autism spectrum also have a mental health condition. We'd like to learn more about your confidence and experience in supporting these people on the autism spectrum by inviting you to complete a short survey.

There are three versions of the online survey. Please select the one that is relevant to you.

Survey for GPs:

www.surveymonkey.com/r/GeneralPractitioner-AMH

Survey for mental health practitioners:

www.surveymonkey.com/r/MentalHealthPractitioner-AMH

Survey for psychiatrists:

www.surveymonkey.com/r/Psychiatrist-AMH

Your responses will enable Autism Queensland to develop and deliver training that will help practitioners provide effective mental health support to people on the spectrum.

For more information or to register your interest in attending training in the area of Autism and Mental Health, please contact the Autism and Mental Health team:
