

Autism and Mental Health Training

A+MH

Free autism-specific training for General Practitioners

These interactive sessions aim to provide GPs with the knowledge and skills to deliver support to adolescent and adult patients on the autism spectrum who have co-occurring mental health conditions.

Topics to be covered during these sessions include:

- Understanding autism
- Getting to know the individual
 - Sensory preferences
 - Communication preferences
 - Modifications
- Co-occurring mental health conditions and their impact

Sessions are delivered in both online and face-to-face formats.

For training schedule and registrations, visit the Autism Queensland website:
