

INDIVIDUAL INCLUSION SUPPORTS

We support inclusive practices through collaborative, family-centred planning, resource development, professional training, and parent coaching

Scan me

These supports are available short or long term, as an extension of or in combination with existing services.

Available for your child at all early education settings & schools in Queensland.

Our therapists and educators work with childcares, kindergartens and schools to create inclusive environments so your child can successfully participate alongside their peers.

Using a strengths-based approach and co-designed with you and staff at the education setting, we will develop tailored, inclusive strategies to support your child's needs. This may include resource development, staff training, and parent coaching.

Our professional staff will:

- Support you to develop personalised goals for your child.
- Help you build effective relationships with your child's support staff.
- Utilise evidence-informed practices to support your child.
- Coordinate and collaborate planning sessions and meetings with you and your child's support staff.
- Support your child alongside their peers and develop strategies that include children at a whole class level.
- Support your child's emotional, social and learning development at every step.

Our staff can work with you on the provision of supports, strategies and resources for any future settings in your child's education journey.

Sessions are available at AQ centres, your child's school, early childhood centre, vocational service, or home etc. Fees apply, NDIS funding may be used if applicable.
