# Early Childhood Intervention (ECI) Groups

**Our EarlyAQtion ECI Groups, for young children age 2-7, are designed to provide a structured, supportive and therapeutic neurodiversity-affirming environment where all children can thrive and participate.**

- **Tailored Support:** Customised to meet each child's unique needs and strengths.
- **Safe & Inclusive Environment:** High staff-to-child ratios and a carefully planned and welcoming space that embraces diversity and encourages participation.
- **Strength-Based Approach:** Activities designed to explore each child's strengths and interests, fostering meaningful skill development with ongoing family involvement.
- **Family-Centred:** Ongoing collaboration with families and other stakeholders supporting your child.
- **Best Practice:** Aligned with Early Childhood Intervention Guidelines.

## We understand the unique needs of autistic children...

Children attend EarlyAQtion ECI Groups during blocks aligning with school terms. Families can select 1, 2, or 3 sessions per week, across 1 to 4 blocks per year. We offer complete flexibility based on the preferences of your family.

*"It's given me the strength to feel like I can do this... and the skills as well."*

*"We have joy, we have confidence... it has helped us as parents to understand our child better... We can now cater to our child's needs in a much better fashion and that helps the whole family."*

## Small group structures foster inclusion...

### Why choose AQ?

Having a transdisciplinary EarlyAQtion team means that each ECI group is led by an occupational therapist, speech pathologist, or teacher (known as the Group Leader). They are supported by two dedicated EarlyAQtion assistants and additional therapists or educators as required. Together they collaborate closely with families with combined expertise to deliver individualised and evidence-based supports for each child.

### Delivered across the state\* our ECI groups provide:

- **Individual Assessments:** Evaluations conducted prior to enrolment.
- **Goal Setting:** Collaborative planning with families to set and review goals for ongoing progress.
- **Positive Behaviour Support:** Promoting a positive approach and understanding to behaviour that focuses on a constructive and empathetic learning environment.
- **Holistic Support:** Helping children thrive at home, in their communities, and in educational settings.

**Please note:** Fees apply and are priced according to *NDIS Pricing Arrangements*. Terms and conditions apply, see website for details. Not available at all AQ centres and waitlists may apply.

**Help your child thrive with tailored, supportive groups that build meaningful skills for life:**
