

Service Overview

Inclusion Supports

Our therapists and educators work with early childhood settings and schools to create inclusive environments where your child can meaningfully learn and play alongside their peers. We support inclusion through collaborative, family-centred planning, resources, training, and parent coaching.

Available at any early childhood setting or school in Queensland

Using a strengths-based and co-designed approach, we collaborate with your family and the professionals supporting your child to develop inclusive and tailored strategies.

Our team will:

- Apply evidence-informed strategies to shape personalised goals for your family.
- Strengthen your connection with the professionals supporting your child.
- Coordinate planning sessions and work closely with all stakeholders.
- Create inclusive strategies to support your child's participation and connections.
- Nurture your child's social, emotional, and learning development at every step.
- Discuss the provision of supports, strategies, and resources for any future settings in your child's education journey (if required).

Statewide Delivery (short or long term): Available face-to-face at AQ centres across Queensland (centre services may vary), within the community/at your child's education setting (travel fees may apply), or statewide via Telepractice. Waitlists may apply.
